ARTICLES

A

Aircraft and Guided Missile Structures, Kinetic Heating in	81–82
Alloy and Special Steels in Railway Work. By Professor H. O'Neill	74–76
Aluminium Alloys (High Strength), Overheating Effects in. By T. R. G. Williams	33–37
Aluminium Curtain Walling on New Telephone Exchange	133
Aluminium Deckhouse Structure, Cargo Ship with	82
Aluminium Die Caster, Furnaces for the	142–143
Aluminium Ingots, Scalping of. New Holroyd Machine at Banbury	89–90
Annealing Motor Vehicle Forgings	243–244
Arc Furnace (New) has 66 kV. Transformer with On-Load Tap Changing	242–243
Arc Furnaces, Large. Metalectric Exhibition in Sheffield	275–276
Arc Furnace, South Africa's First Large	293–294
Austenitic Steel, The Extraction of Minor Phases from. By Dr. J. F. Brown, W. D. Clark and A. Parker	215–223
Axle (Railway), History of the	229–230

B

Bearings (Rolling Mill), New Advance in	246
Beta - Manganese Structure (Occurrence of the) in Transition Metal Alloys and Some Observations on Chi-Phase Equilibria. By Dr. H. J. Goldschmidt	17–26
B.I.S.R.A. Performance Recorder, The	13–15
Blast Furnace, The Production of Zinc in a. By S. W. K. Morgan	115–120
British Cast Iron Research Association. By G. R. Woodward	183–188
British Iron and Steel Research Association	169–174
British Non-Ferrous Metals Research Association. By E. C. Mantle	179–182, 188
British Steel Castings Research Association. By Dr. A. H. Sully	189–192
British Welding Research Association, New Metallurgical Laboratory for	137–140
British Welding Research Association	175–178
B.S.C.R.A.'s New Research Station	29–32, 37
Burners, High Pressure Jet. New Technique Aids Localised Heating	125–128

C

Cast Al-Si-Cu Alloys (Relative Creep Resistance of) to LM4 and LM21. By Dr. J. McKeown and R. D. S. Lushey	27–28
Cast Iron, The Direct Chloride Process for Tinning. By C. J. Thwaites and J. J. Day	263–270
Ceramic Tools at PERA, Research into	270
Chi-Phase Equilibria, Occurrence of the Beta-Manganese Structure in Transition Metal Alloys and Some Observations on. By Dr. H. J. Goldschmidt	17–26
Coal Science Lecture, Sixth—"From Coal to Coke"	236, 238
Computers in the Iron and Steel Industry	90
Continuous Stress-Relief of Transformer Laminations	69–70
Co-operative Research. Survey of Activities of the Research Associations	169–192
Creep Resistance (Relative) of Cast Al-Si-Cu Alloys to LM4 and LM21. By Dr. J. McKeown and R. D. S. Lushey	27–28
Cut-up Line (Cold), Electrical Equipment for a. Heavy Gauge Installation at S.C.O.W.	57–60

D

Deoxo Purifier (Largest) on Stream	12
Deposition of Metals other than those of the Titanium Group by the Hot Filament Technique. By R. A. J. Shelton	283–289
Direct Chloride Process for Tinning Cast Iron. By C. J. Thwaites and J. J. Day	263–270
Dredging (Grab) for Minerals in the Open Sea	83
D.S.I.R. Annual Report, 1955–56. Progress with the Five Year Plan	212
Dud Dudley. An Overestimated Writer. By Dr. R. A. Mott	296–297

E

Elastic Moduli and Tensile Properties of Titanium-Carbon and Titanium-Aluminium-Carbon Alloys. By H. Brooks, G. I. Lewis and J. I. M. Forsyth	277–282
Electrical Equipment for a Cold Cut-up Line. Heavy Gauge Installation at S.C.O.W.	57–60
Electrical Plant. Translator Control	140–141
Electrodeposited Metals, The Physical Properties of. By T. E. Such	61–66, 121–124
Extraction of Minor Phases from Austenitic Steel. By Dr. J. F. Brown, W. D. Clark and A. Parker	215–223

F

Fatigue Curve of Mild Steel, Strain-Ageing as an Explanation of the "Knee" in the. By J. C. Levy	71–73
Fatigue Life as a Function of Surface Conditions. By D. E. Swets and R. C. Frank	230
Flame Cleaning. An Effective Preparation for Painting	143–144
Forging Presses, Improved Control for	84
Forgings, Annealing Motor Vehicle	243–244
Formation and Machine Shaping of Materials, Mechanics of. Report on Investigations at M.E.R.L.	134–136
Foundry, Heating and Ventilating a Mechanised	294–295
Foundry (Steel) Plant on Show. K. & L. Open Day	77–81
Fulmer Research Institute	85–88
Furnace Dismantling, Speedier	144
Furnaces (Arc), Large. Metalectric Exhibition in Sheffield	275–276
Furnaces for the Aluminium Die Caster	142–143

G

Grab Dredging for Minerals in the Open Sea	83
Guided Missile and Aircraft Structures, Kinetic Heating in	81–82

H

Hardness and other Physical Properties of Metals in Relation to Temperature. By E. R. Petty	231–236
Heating and Ventilating a Mechanised Foundry	294–295
High Pressure Jet Burners. New Technique Aids Localised Heating	125–128
High Strength Aluminium Alloys, Overheating Effects in. By T. R. G. Williams	33–37
Hot Filament Technique, the Deposition of Metals other than those of the Titanium Group by the. By R. A. J. Shelton	283–289

I

Industrial Potential of Titanium	114
Irradiated Lithium Fluoride Crystals, Square Bubbles in	245

J

Jet Burners, High Pressure. New Technique Aids Localised Heating	125–128

K

Kinetic Heating in Aircraft and Guided Missile Structures	81–82
"Knee" (Strain-Ageing as an Explanation of the) in the Fatigue Curve of Mild Steel. By J. C. Levy	71–73

L

Laboratory Simulation, Metropolitan-Vickers System for. Kinetic Heating in Aircraft and Guided Missile Structures	81–82
Lithium Fluoride Crystals (Irradiated), Square Bubbles in	245

Page

M

Machine Shaping and Formation of Materials, Mechanics of. Report on Investigations at M.E.R.L. 134–136
Malvern Radio Telescope 195–196
Mechanics of Formation and Machine Shaping of Materials. Report on Investigations at M.E.R.L. 134–136
Metallurgical Laboratory (New) for B.W.R.A. 137–140
Metallurgical Research at the N.P.L., New Techniques Aid 9–12
Metallurgy, A Metallurgist's View of. By E. E. Schumacher .. 129–133
Mild Steel, Strain-Ageing as an Explanation of the "Knee" in the Fatigue Curve of. By J. C. Levy 71–73
Minor Phases, The Extraction of, from Austenitic Steel. By Dr. J. F. Brown, W. D. Clark and A. Parker 215–223
Motor Vehicle Forgings, Annealing 243–244
Moulding of Plastics, Tool Steels for the. By C. C. Hanson .. 109–114

N

National Physical Laboratory, New Techniques Aid Metallurgical Research at the 9–12

O

On-Load Tap Changing, New Arc Furnace has 66 kV. Transformer with 242–243
Overheating Effects in High Strength Aluminium Alloys. By T. R. G. Williams 33–37
Oxide Films on Tin and Tinplate, An Examination of. By S. C. Britton and K. Bright 163–168

P

PERA, Research into Ceramic Tools at 270
Performance Recorder, The B.I.S.R.A. 13–15
Permanent Way Material Production. United Steels' Workington Plant 3-8, 37
Physical Properties of Electrodeposited Metals, The. By T. E. Such 61–66, 121–124
Physical Properties (Hardness and other) of Metals in Relation to Temperature. By E. R. Petty 231–236
Plastics, Tool Steels for the Moulding of. By C. C. Hanson 109–114
Powder Metallurgy 271–275
Power Plant for Titanium Production. New Cyclone-Fired Boiler at I.C.I. Metals' Kynoch Works 290–292
Production Engineering Research Association, The. By D. D. Morgan 224–228

R

Radio Telescope, Malvern .. 195–196
Railway Axle, History of the .. 229–230
Railway Work, Alloy and Special Steels in. By Professor H. O'Neill 74–76
Réaumur—Pioneer Metallurgist and Scientist. By M. Schofield 193–194
Rolling Mill Bearings, New Advance in 246

Page

S

Scalping of Aluminium Ingots. New Holroyd Machine at Banbury 89–90
Semi-Automatic Ultrasonic Flaw Detector 28
Square Bubbles in Irradiated Lithium Fluoride Crystals .. 245
Steel (Austenitic), The Extraction of Minor Phases from. By Dr. J. F. Brown, W. D. Clark and A. Parker 215–223
Steel Foundry Plant on Show. K. & L. Open Day 77–81
Strain-Ageing as an Explanation of the "Knee" in the Fatigue Curve of Mild Steel. By J. C. Levy 71–73
Strain, Properties of Materials at High Rates of. By K. N. Leibovic 239–241
Stress-Relief (Continuous) of Transformer Laminations .. 69–70
Surface Conditions, Fatigue Life as a Function of. By D. E. Swets and R. C. Frank 230

T

Temperature, Hardness and other Physical Properties of Metals in Relation to. By E. R. Petty 231–236
Tensile Properties and Elastic Moduli of Titanium-Carbon and Titanium-Aluminium-Carbon Alloys. By H. Brooks, G. I. Lewis and J. I. M. Forsyth 277–282
Tin and Tinplate, An Examination of Oxide Films on. By S. C. Britton and K. Bright 173–168
Tinning Cast Iron, The Direct Chloride Process for. By C. J. Thwaites and J. J. Day 263–270
Titanium-Carbon and Titanium-Aluminium-Carbon Alloys, Elastic Moduli and Tensile Properties of. By H. Brooks, G. I. Lewis and J. I. M. Forsyth 277–282
Titanium, Industrial Potential of 114
Titanium Production, Power Plant for 290–292
Tool Steels for the Moulding of Plastics. By C. C. Hanson 109–114
Translator Control. A New Method of Controlling Electrical Plant 140–141
Transformer Laminations, Continuous Stress-Relief of .. 69–70
Transition Metal Alloys, Occurrence of the Beta Manganese Structure in, and Some Observations on Chi-Phase Equilibria. By Dr. H. J. Goldschmidt 17–26

U

Ultrasonic Flaw Detector, Semi-Automatic 28
Universal Beams and their Applications 276

V

Vacuum Melted Steel 237–238
Ventilating and Heating a Mechanised Foundry 294–295

W

Walking Dragline for Opencast Ironstone Quarry 67–68

Z

Zinc (The Production of) in a Blast Furnace. By S. W. K. Morgan 115–120

Page

CORRESPONDENCE

Rust Proofing. Southern Metalife, Ltd. 148
Spatter Adhesion Preventative. Amber Oils, Ltd. 43
Spray Nozzles. Alfred Bullows & Sons, Ltd. 304
Surface Active Agents. The Geigy Company, Ltd. 41
Surface Grinders. Abrasive Machine Tool Co. 199
Ultrasonic Engraving Tool. Mullard, Ltd. 301
Welding Electrodes, New. Quasi-Arc, Ltd. 42–43
Welding Roller Bed. Quasi-Arc, Ltd. 41

LABORATORY METHODS

Aluminium Alloys, The Application of an Intermittent A.C. Arc Unit to the Analysis of. By J. H. Oldfield and E. A. R. Ferm 205–209
Analysis of Cast Iron and Foundry Materials, Some Recent Advances in the. By W. E. Clarke 47–52
Analysis of Silver Solder Alloys. By E. Jackson 307–309
Apparatus for Measurement of the Occlusion of Hydrogen by Metals. By M. Kotyk, J. K. Magor and H. M. Davis 153–155
Balance, Quick-Acting 312
Blister and Refined Copper, Determination of Iron, Nickel and Lead in. By S. Barabas and W. Charles Cooper .. 101–103
Bureau of Analysed Samples, Ltd. 52, 54
Cast Iron and Foundry Materials, Some Recent Advances in the Analysis of. By W. E. Clarke 47–52
Copper (Blister and Refined), Determination of Iron, Nickel and Lead in. By S. Barabas and W. Charles Cooper .. 101–103
Creep Tests on Materials for Gas-Cooled Reactors. New Research Equipment at G.E.C. Atomic Laboratories 313–314
Gas-Cooled Reactors, Creep Tests on Materials for. New Research Equipment at G.E.C. Atomic Laboratories 313–314
Hydrogen by Metals, An Apparatus for Measurement of the Occlusion of. By M. Kotyk, J. K. Magor and H. M. Davis 153–155
Inorganic Solids, The Analysis of, by the Mass Spectrometer 155–156
Instrument Exhibitions, Items of Metallurgical Interest at Recent .. 53–54, 104–106, 156–160, 210–212, 258, 260
Interference Microscope, A New. Assessing Surface Finish .. 310–312
Intermittent A.C. Arc Unit, The Application of an, to the Analysis of Aluminium Alloys. By J. H. Oldfield and E. A. R. Ferm 205–209
Iron, Nickel and Lead (Determination of) in Blister and Refined Copper. By S. Barabas and W. Charles Cooper 101–103
Lead, Nickel and Iron (Determination of) in Blister and Refined Copper. By S. Barabas and W. Charles Cooper 101–103
Mass Spectrometer, The Analysis of Inorganic Solids by the .. 155–156
Micro-Hardness Testing 259–260
Microscope (Interference), A New. Assessing Surface Finish 310–312
Nickel, Iron and Lead (Determination of) in Blister and Refined Copper. By S. Barabas and W. Charles Cooper 101–103
Occlusion of Hydrogen by Metals, An Apparatus for Measurement of the. By M. Kotyk, J. K. Magor and H. M. Davis 153–155
Quick-Acting Balance 312
Reactors (Gas-Cooled), Creep Tests on Materials for. New Research Equipment at G.E.C. Atomic Laboratories 313–314
Refined and Blister Copper, Determination of Iron, Nickel and Lead in. By S. Barabas and W. Charles Cooper 101–103
Silver Solder Alloys, The Analysis of. By E. Jackson .. 307–309
Steelmaking Slags, The Rapid Analysis of. By S. Muir and A. D. Ambrose 255–257
Surface Finish, Assessing. A New Interference Microscope 310–312
